

Retraction Notice

Article: *Influence of Haemoglobin Genotypes and Location on Morphometric Traits of West African Dwarf Goats in Zaria*

The Editorial Office has retracted this article following an investigation into allegations of plagiarism.

The investigation determined that the article contains substantial textual overlap and duplicated data from the previously published article, "*Effect of Interaction of Haemoglobin Genotypes with Locations on Morphometric Traits of West African Dwarf Goats Raised in Akwa Ibom State, Nigeria*," published in the *Journal of Animal Science and Veterinary Medicine* (Volume 10, Issue 4, August 2025). It was concluded that the extent of the overlap compromises the originality, integrity, and reliability of the published work and constitutes a breach of the journal's publication ethics standards.

In accordance with the journal's publication ethics procedures, the authors were informed of the allegations and were given an opportunity to respond before a decision was reached. After considering the available evidence and the authors' responses, the retraction of this article was approved.

The original article will remain available online as part of the scholarly record but will be clearly identified as **Retracted**, with this Retraction Notice permanently linked to the article.

Date of Retraction: 3 August 2026
